CELEBRATING 120 YEARS OF YMCA OF THE PINES

eversolar

Sign up now to save up to 25% on your utility bill!

Secure a spot on the waitlist today for early access in 2026 for ACE, PSE&G and JCP&L customers.

Save an average of $250/year through the New Jersey Community Solar Energy Program.

Save monthly for 20 years

YMCA of the Pines has partnered with Eversolar, a local community solar provider sending clean energy to the grid, to help you save on your electric bills. Discounts are up to 25% on your monthly supply and delivery charges. These projects aren't open yet, but we are giving you the chance to be first to sign up in early 2026!

Sign up online!

There is no charge to sign up for this program, no credit check required, no panels to install, and you can cancel at any time without penalty. Scan the QR code to learn more and sign up.

New Jersey's cleanenergy program

Frequently Asked Questions

Isn't this too good to be true?

We are so happy to share that it isn't! Community solar is a NJ state benefit program. The guaranteed discounts are mandated by the program, and developers have to stick to strict consumer protections.

What are the program's consumer protections?

No fee to start or stop your subscription, no credit checks, and guaranteed savings per your agreement (backed by law).

Is there any installation required?

No. There is no need to install panels on your roof. Eversolar projects are located on a warehouse rooftop and the clean energy is shared with the local community.

What do customers need to sign up?

Customers should have a copy of their electric bill or account number available. They will also need to provide their name and address, confirm whether or not they qualify as low to moderate income. That' it!

When will I move off the waitlist start seeing savings?

This program was so popular that all spots are currently full. Additional spots will become available early in 2026. Once you move off the waitlist, you'll also receive a $50 gift card from Eversolar. Those projects will energize and start delivering savings early in 2027.

What are the downsides of community solar?

CSEP is a program designed to provide no-risk savings to NJ residents of all incomes. However, if you are able to invest in installing panels on your own home, you may generate more savings in the long run.

How do I save money with community solar?

When you subscribe to a community solar farm, you receive solar credits for your share of the clean energy the farm produces, discounted by a guaranteed percentage each month. With current projects, if your share produces $100 of solar credits in one month, you'll save $25!
