## Scouts lead effort to beautify Medford camp

MEDFORD — Local Boy Scouts led dozens of dedicated volunteers from the YMCA camp in Medford recently to prepare for the thousands of campers and visitors who come to YMCA Camp Ockanickon.

In May, Jacob Delancy, of Medford, a Boy Scout with Troop 20, took on an ambitious service project at Cherokee Beach, one of four beaches at the 800-acre camp.

With a team of 40 volunteers, Delancy cleaned up debris accumulated from the winter, spread 25 tons of new sand near the swim and playground areas, built a canoe rack and constructed a “lost and found” display post.

“This project really helps the YMCA camp because it provides a much-needed cleanup to one of the few beaches,” Delancy said.

“Cleaning up the beaches will lead to a better experience for kids who attend camp.”

Delancy even documented the cleanup

on video, which can be viewed on YouTube.

Earlier in the spring, Dan Smith, of Medford, a scout with Troop 26, also organized volunteers for his service project. He and more than a dozen helpers built and installed benches for fire pits in three locations at the boys’ sleepaway camp. Located at 1303 Stokes

Road in Medford, YMCA Camp Ockanickon has operated for more than a century. In addition to summer camp, the non-profit organization offers family programs, annual memberships, childcare, class trips, birthday parties and retreats.

# Break Free from Neuropathy with a New Supportive Care Cream

A patented relief cream stands to help millions of Americans crippled from the side effects neuropathy by increasing sensation and blood flow wherever it’s applied

Raymond Wilson  
The Associated Health Press

**AHP** — A recent breakthrough stands to help millions of Americans plagued by burning, tingling and numb legs and feet.

But this time it comes in the form of a cream, not a pill, suggesting the medical community may have been going about the problem all wrong.

The breakthrough, called *Diabasens*, is a new relief cream developed for managing the relentless discomfort caused by neuropathy.

When applied directly to the legs and feet, it causes arteries and blood vessels to expand, increasing the flow of warm, nutrient rich blood to damaged tissue.

However, what’s most remarkable about the cream...and what makes it so brilliant...is that it contains one of the only natural substances known to activate a special sensory pathway right below the surface of the skin.

This pathway is called TRPA1 and it controls the sensitivity of nerves. In laymen terms, it determines whether you feel pins and needles or soothing relief.

Studies show that symptoms of neuropathy arise when the nerves in your legs deteriorate and blood flow is lost to the areas which surround them.

As the nerves begins to die, sensation is lost. This lack of sensation is what causes the feelings of burning, tingling and numbness.

This is why the makers of *Diabasens* say their cream has performed so well in a recent clinical use survey trial. It increases sensation and blood flow where ever its applied.

**No Pills,  
No Prescriptions,  
No Agony**

Until now, many doctors have failed to consider a topical cream as an effective way to manage neuropathy. *Diabasens* is proving it may be the only way going forward.

“Most of today’s treatment methods have focused on minimizing discomfort instead of attacking its underlining cause. That’s why millions of adults are still in excruciating pain every single day, and are constantly dealing with side effects” explains Dr. Esber, the creator of *Diabasens*.

“*Diabasens* is different. Since the most commonly reported symptoms — burning, tingling and numb legs and feet — are caused by lack of sensation of the nerves, we’ve designed the formula increase their sensitivity.

And since these nerves are located right below the skin, we’ve chosen to formulate it as a cream. This allows for the ingredients to get to them faster and without any drug like side effects” he adds.

**Study Finds Restoring Sensation the Key To Effective, Long Lasting Relief**

With the conclusion of their latest human clinical use survey trial, Dr. Esber and his team are now offering *Diabasens* nationwide. And

**Topical Creams Offer Sufferers a Safer, More Effective Avenue of Relief:** *Diabasens* increases sensation and blood flow wherever its applied. It’s now being used to relieve painful legs and feet.

regardless of the market, its sales are exploding.

Men and women from all over the country are eager to get their hands on the new cream and, according to the results initial users reported, they should be.

In the trial above, as compared to baseline, participants taking *Diabasens* saw a staggering 51% increase sensitivity in just one week. This resulted in significant relief from burning, tingling and numbness throughout their legs.

Many participants taking *Diabasens* described feeling much more balanced and comfortable throughout the day. They also noticed that after applying, there was a pleasant warming sensation that was remarkably soothing.

**Diabasens Users Demand More**

Many of *Diabasens* users say their legs have never felt better. For the first time in years, they are able to walk free from the symptoms which have made life hard.

“I have been using the cream now for about ten days. It has given me such relief.

I’ve had very bad foot pain from injuries and overuse of my feet for years which have contributed to severe itching/tingling and pain for some time. (My father also suffered from this pain and itching. I wish I would have had this for him.)

The first time I used the cream, I felt an almost immediate relief from this.

I now use it at least twice a day: once in the morning before work and once at night before I sleep.

I am so delighted with this. It has helped my walking, also. It has helped generate feeling again in my feet,” raves Marsha A. from Texas

**Diabasens is shown to provide relief from:**

- Burning
- Swelling
- Tingling
- Heaviness
- Numbness
- Cold extremities

**Targets Nerve Damage Right Below the Skin’s Surface**

*Diabasens* is a topical cream that is to be applied to your legs and feet twice a day for the first two weeks then once a day after. It does not require a prescription.

The active ingredient is a compound known as cinnamaldehyde.

Studies show that neuropathy and nerve pain is caused when the peripheral nerves breakdown and blood is unable to circulate into your legs and feet.

As these nerves deteriorate, sensation is lost. This is why you may not feel hot or cold and your legs and feet may burn, tingle and go numb.

Additionally, without proper blood flow, tissues and cells in these areas begin to die, causing unbearable pain.

The cinnamaldehyde in *Diabasens* is one of the only compounds in existence that can activate TRPA1, a special sensory pathway that runs through your entire body.

According to research, activating this pathway (which can only be done with a cream) increases the sensitivity of nerves, relieving feelings of tingling and numbness in your legs and feet.

Supporting ingredients boost blood flow, supplying the nerves with the nutrients they need for increased sensation.

**Amazing Relief Exactly Where You Need It**

With daily use, *Diabasens* users report remarkable improvements in their quality of life without of the negative side effects or interactions associated with prescription drugs.

Readers can now enjoy an entirely new level of comfort that’s both safe and affordable. It is also extremely effective, especially if nothing else has worked.

**Discounted Supply of Diabasens for Local Readers**

This is the official release of *Diabasens*. As such, the company is offering a special discounted supply to any reader who calls within the next 48 hours.

A special hotline number and discounted pricing has been created for all Pennsylvania residents. Discounts will be available starting today at 6:00AM and will automatically be applied to all callers.

Your Toll-Free Hotline number is 1-800-338-1408 and will only be open for the next 48 hours. Only a limited discounted supply of *Diabasens* is currently available in your region.

THESE STATEMENTS HAVE NOT BEEN EVALUATED BY THE FDA. THIS PRODUCT IS NOT INTENDED TO DIAGNOSE, TREAT, CURE, OR PREVENT ANY DISEASE. RESULTS MAY VARY.
